MONTAŽNI SISTEMI

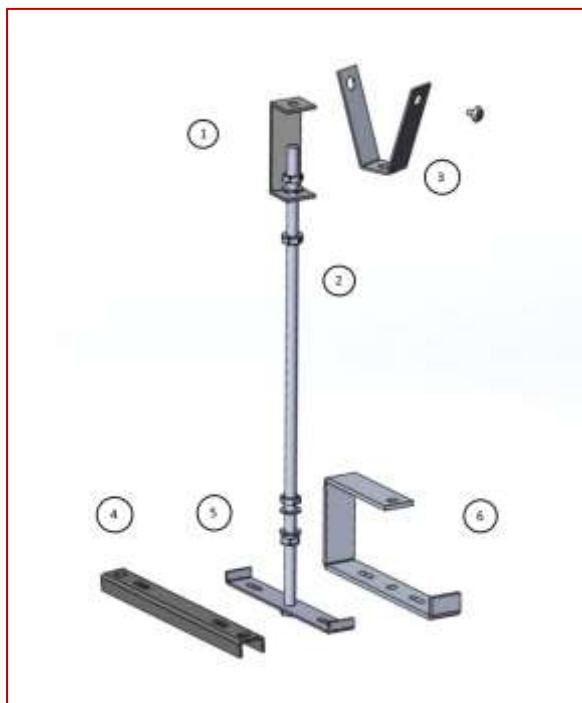

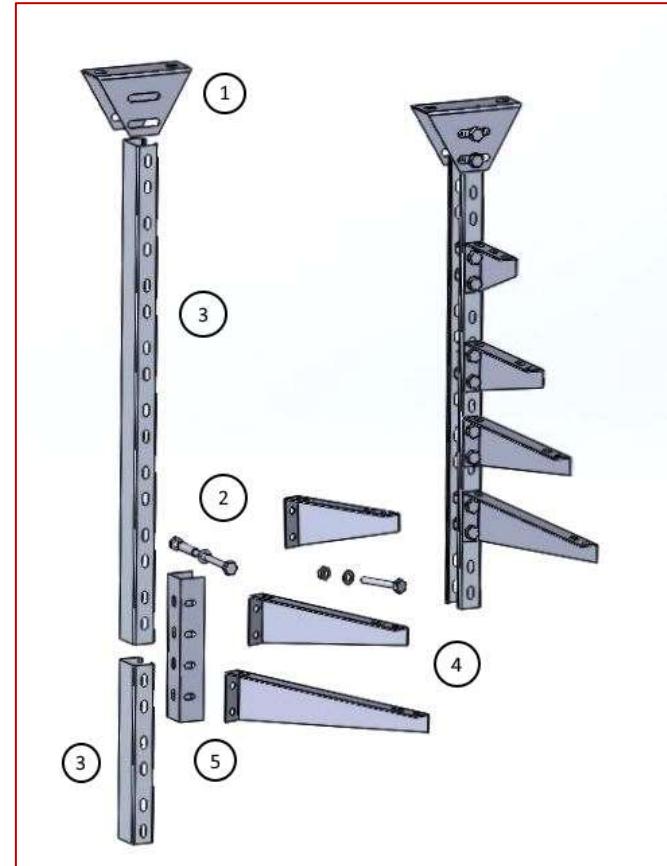

POMOĆ PRI MONTAŽI ELVOD SISTEMA ASSISTANCE FOR MOUNT ELVOD CABLE CARRIER

Kako bi pomogli pri projektovanju i montaži ELVOD sistema nosača kablova razvili smo veliki broj različitih elemenata za montiranje koji se mogu prilagoditi svakoj situaciji na terenu. U zavisnosti od uslova primene tj. sredine, možemo ponuditi četiri vrste zaštite naših elemenata i to od pocinkovanog lima , toplocinkovane elemente , inox elemente i plastificirane elemente prema RAL karti

In order to help design and mount the ELVOD cable tray system, we have developed a number of different mounting elements that can be adapted to any situation on the ground. Depending on the conditions of application ie. the environment, we can offer four types of protection of our elements: galvanized sheet, heat-treated elements, stainless steel elements and plasticised elements according to RAL card

1. Plafonski C nosač
2. Navojna šipka
3. Nosač za trapezni lim Navojna šipka
4. U nosač
5. Srednji nosač za navojnu šipku
6. Plafonski G nosač

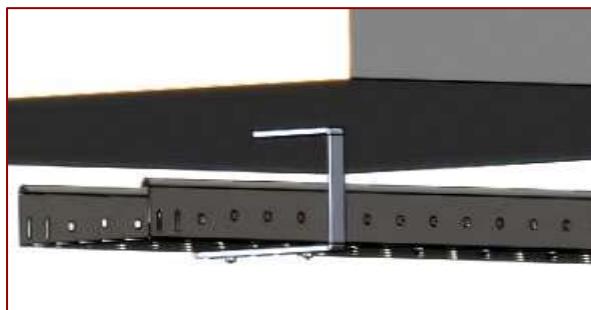

1. Plafonski VN nosač
2. Odstojnik
3. U nosač
4. Konzole
5. Spojnica za U nosač

Veliki broj elemenata otvara širok dijapazon mogućnosti i prilagođavanje svakoj sredini u kojoj se montiraju ELVOD nosači kablova. U narednim primerima daćemo samo neke mogućnosti montažnih sistema, a sve u zavisnosti od površine na koju se vrši vezivanje i montiranje ELVOD sistema nosača kablova

A large number of elements opens up a wide range of options and adjusts to each environment in which ELVOD cable trays are mounted. In the following examples, we will only give some of the possibilities of the mounting systems, all depending on the surface to which the attachment and mounting of the ELVOD system of the cable carrier

PRIKAZ MONTAŽE NA PLAFON PERFORIRANIH NOSAČA KABLOVA REVIEW HOW TO MOUNTING PERFORATED CABLE TRAY ON ROOF

Slika br.1 Montaža na plafon pomoću G nosača

Montaža se može izvesti direktnim vezivanjem G nosača za plafon anker vijcima ili vezivanjem G nosača na prethodno postavljenu navojnu šipku vezanu u plafon anker tiplom

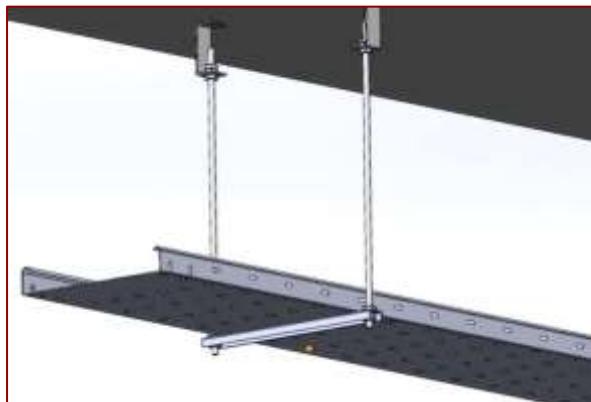

Mounting can be carried out by direct bonding of the G rack mounting bracket with anchor bolts or by attachment of the G carrier to the pre-installed threaded rod connected to the ceiling with anchor

Slika br.2 Montaža na plafon pomoću jedne navojne šipke

Montaža se može izvesti direktno navojnom šipkom vezanom u plafon preko anker tipla i korišćenjem srednjeg nosača ili korišćenjem plafonskog C nosača vezanog anker vijcima na koji se nadovezuje navojna šipka i srednji nosač

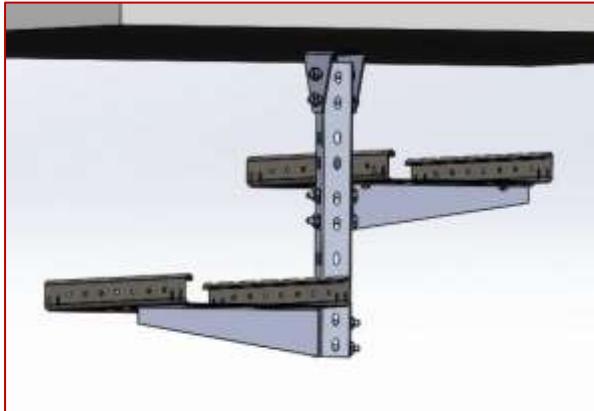

Mounting can be carried out directly by threaded rod connected to the ceiling via the anchor bolt and using a medium carrier or by using a ceiling mounting cage attached with anchor bolts to which the threaded rod and the middle carrier

Slika br.3 Montaža na plafon pomoću dve navojne šipke

Montaža se može izvesti direktno navojnom šipkom vezanom u plafon preko anker tipla i korišćenjem U nosača ili korišćenjem plafonskog C nosača vezanog anker vijcima na koji se nadovezuje navojna šipka i U nosač

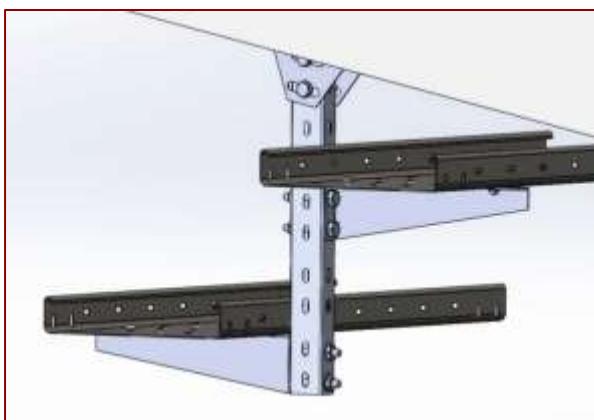

Mounting can be carried out directly by threaded rod connected to the ceiling via the anchor bolt and using the U mounting bracket or by using the ceiling mounting bracket C connected with the anchor bolts to which the threaded rod is connected and U support

Slika br.4 Montaža na plafon U stuba pomoću VN nosača

Montaža na plafon U stuba pomoću VN nosača anker vijcima omogućava široku lepezu mogućnosti pri projektovanju daljim povezivanjem konzola torban vijcima. Takođe učvršćivačem za spajanje dva U stuba mogućnosti se još proširuju

Mounting to the ceiling U pillar using the VN bracket, the anchor bolts provide a wide range of design options by further connecting the bracket with screws. Also, the stiffener for connecting two U pillars is expanding possibilities

Slika br.5 Montaža na zakošeni plafon U stuba pomoću VN nosača

S obzirom da je VN nosač štelujući, povezivanjem na plafon anker vijcima, a sa konzolom torban vijcima, daje mogućnost postavljanja na kose plafone U stuba i nosača kablova, što omogućava maksimalni stepen iskorišćenja prostora projektantima

Considering that the VN carrier is marking, by connecting it to the ceiling with anchor screws, and with the bracket with screws, it is possible to mount on the angle ceiling the U pillar and the cable tray, which allows the maximum degree of space utilization for the designers

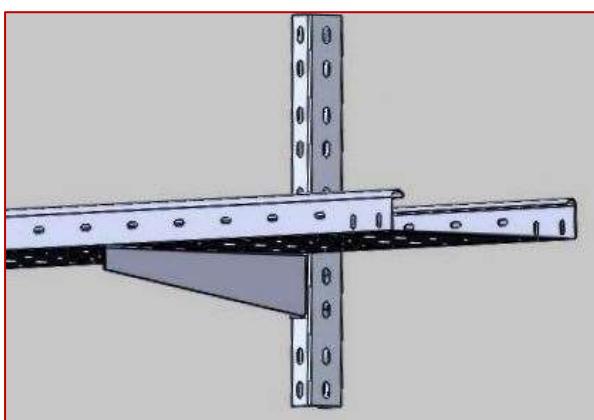

Slika br.6 Montaža na plafon PNK E90 pomoću plafonskog nosača

Montaža se može izvesti vezivanjem plafonskog nosača E90 anker vijcima u plafon i dalje vezivanjem torban vijcima perforiranog nosača kablova otpornog na požar E90

Mounting can be done by bonding the ceiling mounting bracket E90 with anchor screws in the ceiling and further by fastening the screws of the perforated fireproof cable tray E90

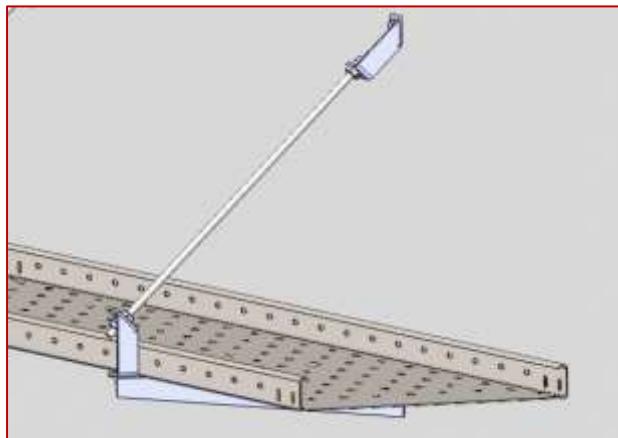

PRIKAZ MONTAŽE NA ZID PERFORIRANIH NOSAČA KABLOVA REVIEW HOW TO MOUNTING ON THE WALL PERFORATED CABLE TRAY

Slika br.7 Montaža na zid U stuba i konzole

Montaža se može izvesti vezivanjem U stuba na zid anker vijcima i dalje vezivanjem konzole na U stub torban vijcima , tako da nam to omogućuje veće iskorišćenje u prostoru

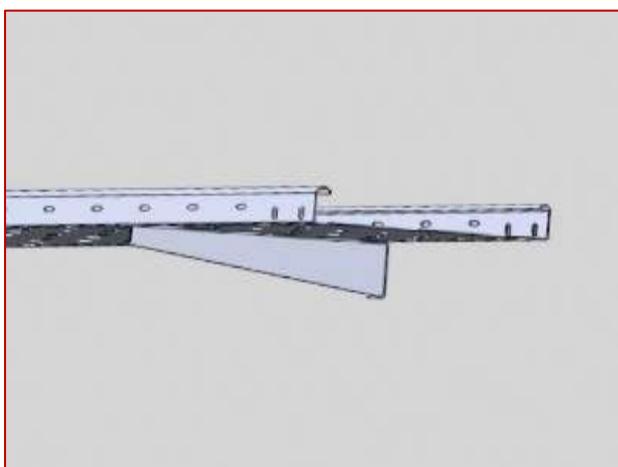

Mounting can be carried out by bonding the U pillar to the wall with anchor bolts and further by tying the console to the U pillar with screws, so that enabling us to make greater use in the space

Slika br.8 Montaža na zid PNK E90 pomoću konzole i kosog nosača

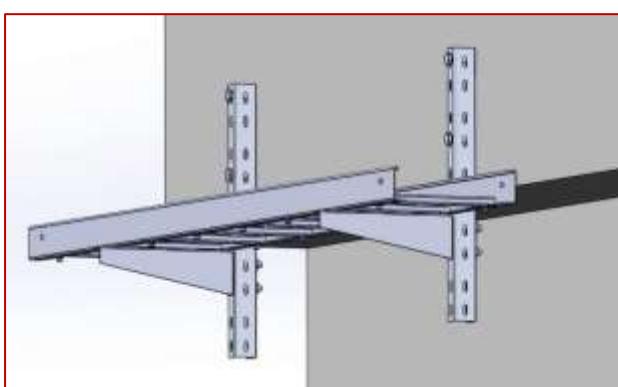

Montaža na zid perforiranog nosača kablova otpornog na vatru E90 pomoću konzole, kosog nosača, torban vijaka i navojne šipke koji takođe nose oznaku E90

Mounting on the wall perforated cable tray which is fire resistant E90 with a bracket, the oblique carriers, screws and the threaded rod, which also bear the E90

Slika br.9 Montaža konzole na zid

Direktno montiranje konzole na zid anker vijcima
Direct mounting of the console on the wall with screws

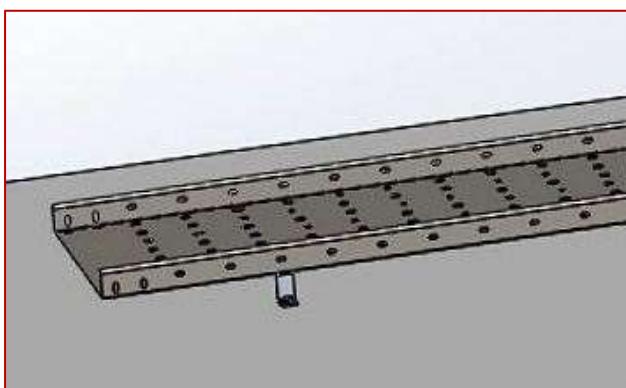

Slika br.10 Montaža konzole na izbačeni deo zida

Direktno montiranje U stuba na istureni deo zida anker vijcima i povezivanje konzole na U stub torban vijcima

Direct mounting U pillar on the protruding part of the wall with anchor bolts and connecting the console to the U pillar screws

PRIKAZ MONTAŽE NA POD PERFORIRANIH NOSAČA KABLOVA

REVIEW HOW TO MOUNTING ON THE FLOOR PERFORATED CABLE TRAY

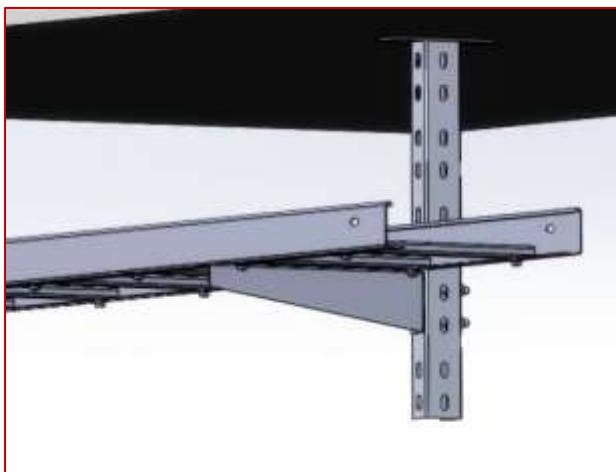

Slika br.11 Montaža na pod pomoću podnog nosača

Direktno montiranje podnog nosača na pod anker vijcima

Direct mounting the floor carrier with anchor bolts to floor

PRIKAZ MONTAŽE NA PLAFON I ZID REŠETKASTIH NOSAČA KABLOVA
REVIEW HOW TO MOUNTING LATTICE CABLE TRAY ON ROOF AND WALL

Slika br.12 Montaža na plafon pomoću U stuba sa USL stopom

Direktna montaže na plafon U stuba sa USL stopom anker vijcima i povezivanje konzole torban vijcima sa U stubom. Mogućnost povezivanja dodatnog U stuba sa postojećim pomoću učvršćivača i torban vijaka

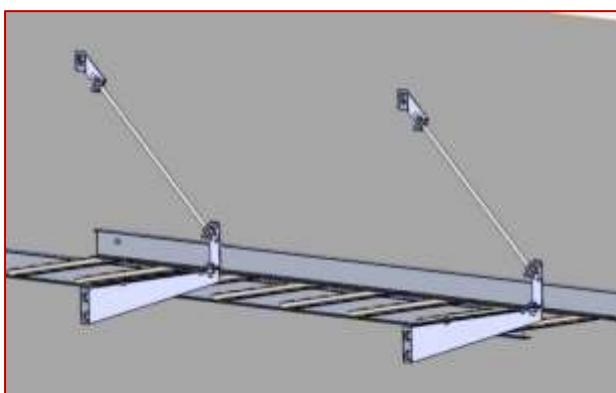

Direct mounting to ceiling U pillar with USL foot with screws and connecting the console with screws with U pillar. Possibility to connect an additional U pillar with existing fixing devices and screws

Slika br.13 Montaža na plafon pomoću U stuba sa USL stopom i poprečnim nosačem

Direktna montaže na plafon U stuba sa USL stopom anker vijcima i povezivanje poprečnim nosačem torban vijcima sa U stubom. Ukoliko su potrebne veće nosivosti montaže na plafon se može izvesti pomoću U stuba sa USS stopom

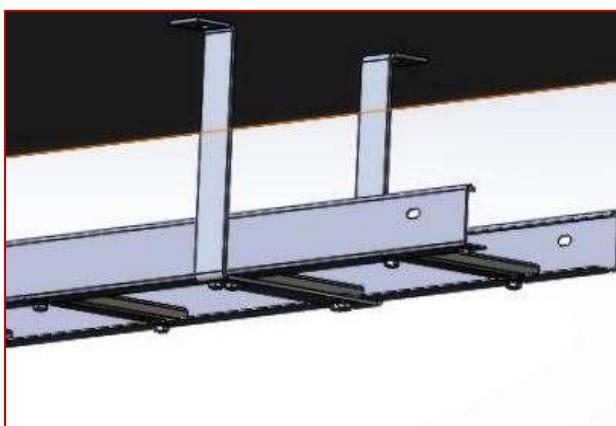

Direct mounting on the ceiling U pillar with the USL foot with anchor screws and connecting the crossbar and U pillar with screws. If a higher ceiling mounting capacity is required, it can be carried out using the U pillar with the USS foot

Slika br.14 Montaža na zid RNK E90 pomoću konzole i kosog nosača

Montaža na zid rešetkastog nosača kablova otpornog na vatru E90 pomoću konzole, kosog nosača, torban vijaka i navojne šipke

Mounting on the wall of the lattice cable tray which is fire resistant E90 with a bracket, the oblique carriers, screws and the threaded rod

Slika br.15 Montaža na plafon RNK E90 pomoću plafonskog nosača

Montaža na plafon rešetkastog nosača kablova otpornog na vatru E90 pomoću plafonskog nosača i torban vijaka

Mounting on the roof of the lattice cable tray which is fire resistant E90 with a ceiling bracket and screws

Za sve elemente pričasnih sistema smo obezbedili različite oblike površinke zaštite prikazane u tabeli ispod

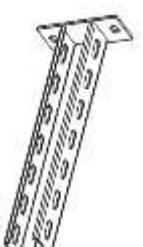

For all elements of the attachment systems, we have provided various shapes of protection surfaces shown in the table below

| Površinska zaštita Surface protection | Oznaka Mark | Oblast primene Field of application | STANDARD |
|--|----------------|---|------------------|
| Galvanizacija cinkom Galvanized sheet | PL | Unutrašnja oblast Internal area | EN 10142 |
| Topla galvanizacija cinkom Hot dip galvanized | TC | Spoljna oblast External field | SRPS EN ISO 1461 |
| Plastifikacija u RAL boje Plastification in RAL | P | Unutrašnja oblast Internal area | |
| Nerđajući čelik Inox | I | Specijalni industrijski zahtevi, prehrambena industrija, farmacija, hemijska industrija itd. Special industrial requirements, food industry, pharmacy, chemical industry , etc. | V2A, V4A |

Pregled elemenata montažnih sistema je dat u tabelama ispod
